

HSS Non-Ferrous Blade Pricing

Choose quality blades from "custom ground" HSS blades from RSC and the Arntz product line for the non-ferrous metal cutting industry. We provide premium quality blades from 6" diameter thru 20" diameter, in various thicknesses.

These non-ferrous blades are suitable for applications requiring durable cut-off saws running at substantially higher RPMs than ferrous cutting saws.

*Don't see the size you need?
RSC is the industry leader in
"custom ground" cutting tools
made to your unique needs.*
